Assignment-2 Business Model Canvas (BMC) Report with Flowchart

"Choose your own startup idea and prepare a Business Model Canvas (BMC) Report along with a supporting Flowchart. Your report should clearly reflect how the business creates, delivers, and captures value."

Project Title: EazePrint: AI-Powered Hyperlocal Cloud Printing Platform

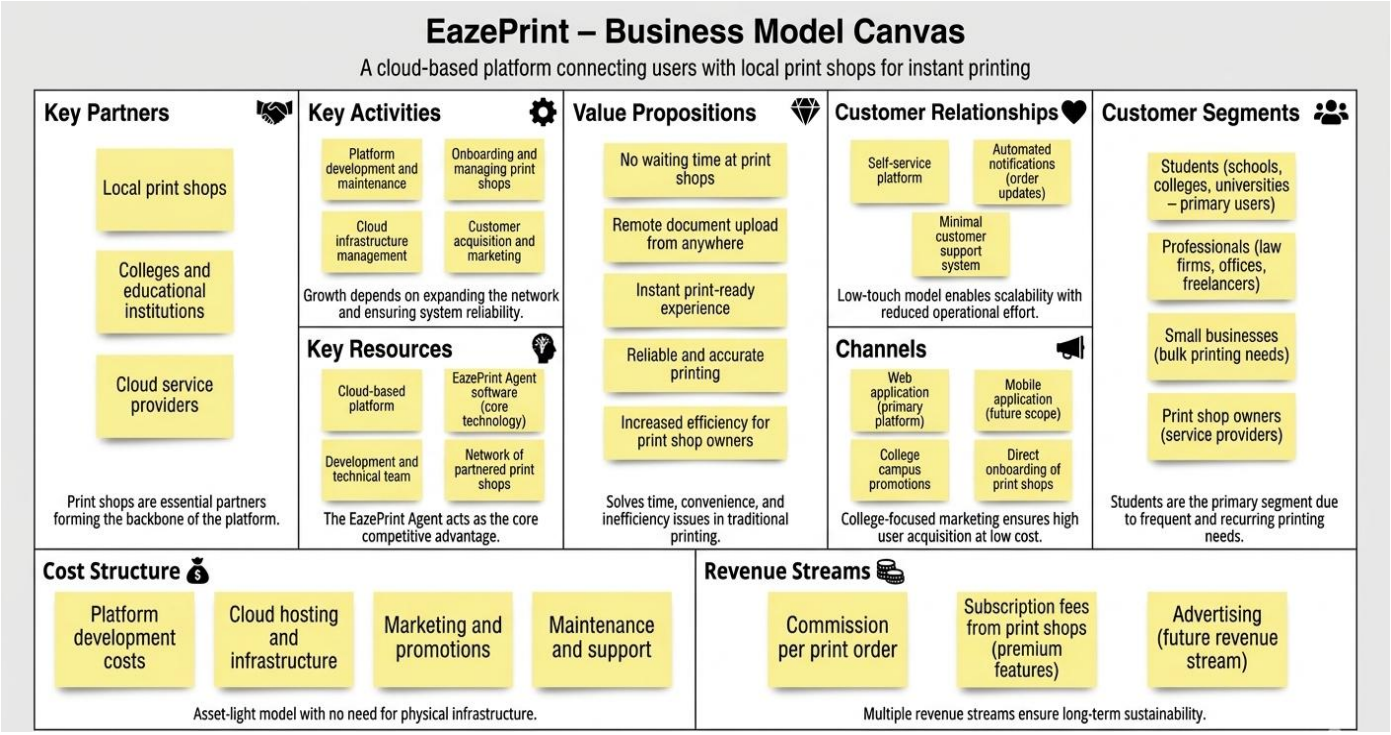
Team Number: 21

Karthika M ENG23CS0090

Naren Yashwanth N ENG23RA0014

Structure & Clarity

BUSINESS CANVAS MODEL:



1. Customer Segments – Why these users?

EazePrint mainly targets **students and professionals** because they frequently need printouts for assignments, documents, and office work.

Print shop owners are also included because they are the **service providers** in the platform.

Insight:
Students are chosen as the primary segment because they generate **regular and repeated demand**, making the business sustainable.

2. Value Proposition – Why will users choose this?

EazePrint provides **fast and convenient printing** by allowing users to send documents online and collect them instantly.

Insight:
The main value is **saving time and reducing effort**, which solves a real daily problem faced by users.

3. Channels – How do users find and use it?

Users access EazePrint through a **website (and future mobile app)**.
Promotion happens mainly through **college campuses and local shops**.

Insight:
Colleges are chosen because they have a **large number of target users in one place**, making marketing easier and cheaper.

4. Customer Relationships – How do we interact with users?

EazePrint uses a **self-service model**, where users can upload and manage orders themselves.

Insight:
This reduces the need for customer support and makes the system **scalable and efficient**.

5. Revenue Streams – How does the business earn?

EazePrint earns money by:

- Taking a **commission on each print order**
- Charging **subscription fees to print shops**

Insight:
Having multiple revenue sources ensures **long-term sustainability and growth**.

6. Key Resources – What is most important?

The most important resources are:

- The **cloud platform**
- The **EazePrint Agent software**
- The **network of print shops**

Insight:
The agent software is unique because it enables **automatic printing**, which gives a competitive advantage.

7. Key Activities – What does the business do daily?

- Developing and maintaining the platform
- Onboarding print shops
- Managing cloud operations
- Attracting users

Insight:
Growth depends on **expanding both users and print shops (network effect)**.

8. Key Partnerships – Who helps the business?

- Local print shops
- Colleges
- Cloud service providers

Insight:
Print shops are essential because they are the **core service providers**, without which the platform cannot function.

9. Cost Structure – Where is money spent?

- Platform development
- Cloud hosting
- Marketing
- Maintenance

Insight:
EazePrint follows an **asset-light model**, meaning it does not need physical infrastructure, reducing costs.

Flowchart Representation

- **Customer journey (awareness → purchase → retention)**

1. Awareness Stage – How users discover EazePrint

Users come to know about EazePrint through:

- College promotions
- Friends and word-of-mouth
- Online platforms

Insight:
Colleges are the best starting point because they have a **high concentration of students who frequently need printing**, making awareness faster and more effective.

2. Consideration Stage – Why users choose EazePrint

After discovering EazePrint, users explore:

- Ease of uploading documents
- Nearby shop availability
- Time-saving benefits

Insight:
Users are attracted mainly by **convenience and time-saving**, which are strong decision factors compared to traditional printing.

3. Purchase Stage – Placing the order

User actions:

- Upload document
- Select print options
- Choose nearby shop
- Confirm order

Insight:
The process is designed to be **simple and quick**, reducing effort and making it easy for first-time users to complete an order.

4. Value Delivery Stage – How service is provided

- Order is sent to the cloud
- EazePrint Agent processes the job
- Shop prints the document
- User collects the print

Insight:
Automation ensures **faster service and accuracy**, improving overall user experience.

5. Retention Stage – Why users come back

- Users receive notifications
- Experience fast service
- Avoid waiting in future

Insight:
Positive experience leads to **repeat usage**, especially for students who need frequent printing.

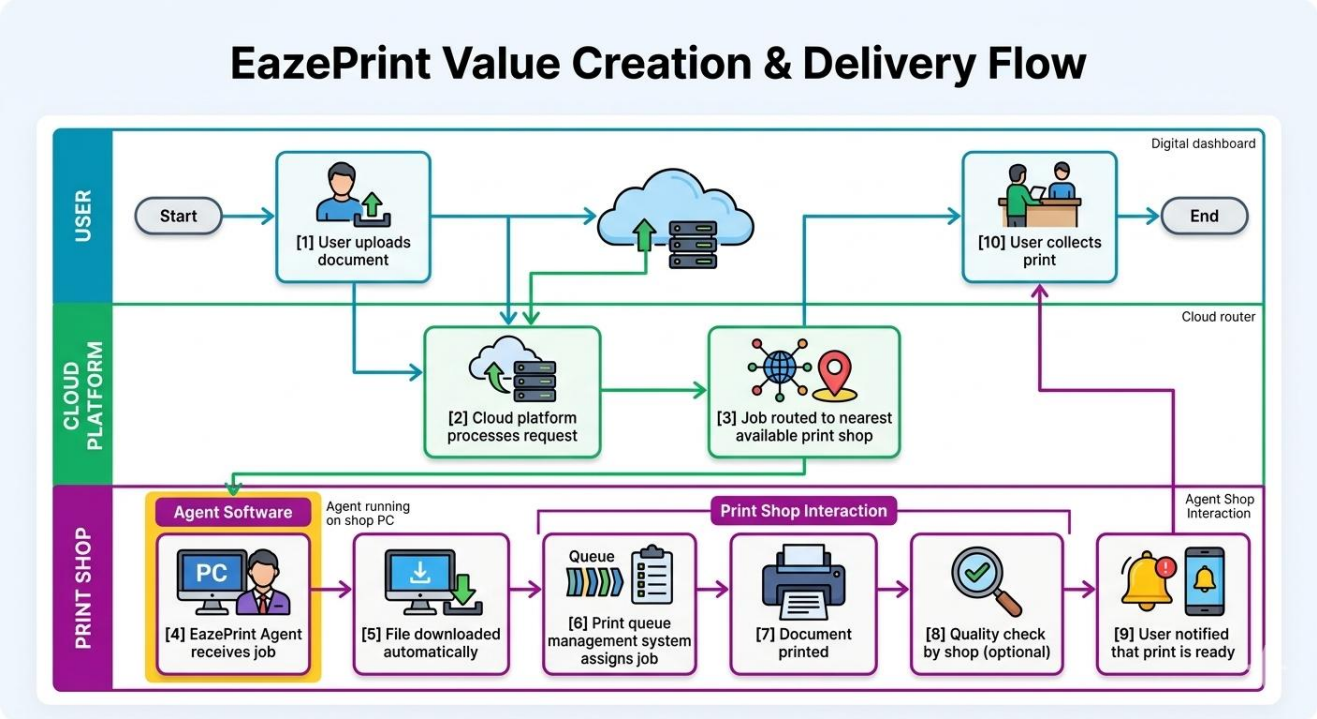
6. Loyalty & Growth (Optional but HIGH IMPACT)

- Users recommend to friends
- Increased usage in colleges
- Network grows naturally

Insight:
Word-of-mouth creates a **network effect**, which helps the platform grow without heavy marketing.

EazePrint Customer Journey Flowchart

- **Value creation & delivery process**



1. Value Creation (Input Stage)

Users upload their documents and select print options on the platform.

Insight:
EazePrint creates value by making printing **easy, digital, and accessible from anywhere**.

2. Processing (System Stage)

The platform processes the request and sends it to the nearest print shop through the cloud system.

Insight:
Cloud-based routing ensures **fast and efficient job allocation**.

3. Value Delivery (Execution Stage)

The EazePrint Agent automatically receives the file and sends it to the printer for printing.

Insight:
Automation reduces manual work and ensures **speed and accuracy**.

4. Output (Customer Stage)

The print shop completes the job and the user collects the printed document.

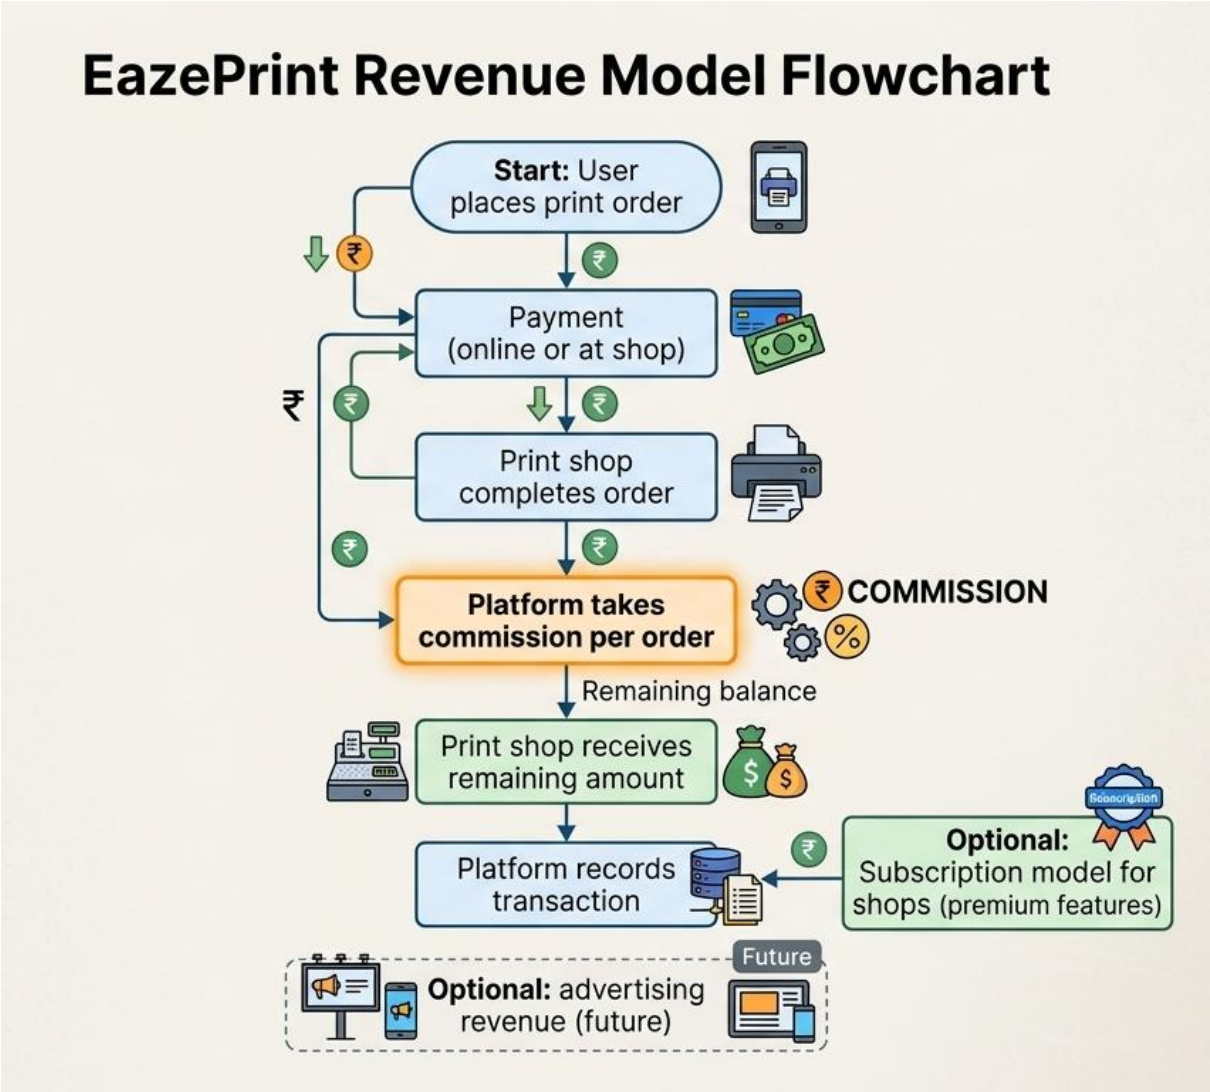
Insight:
Users get a **ready-to-collect print**, eliminating waiting time.

5. Feedback & Improvement

Users receive updates and can provide feedback.

Insight:
Feedback helps improve service quality and ensures **customer satisfaction**.

- **<u>Revenue Model</u>**



1. Order Placement

Users place a print order through the EazePrint platform.

Insight:
Every order creates an opportunity to generate revenue.

2. Payment Process

Users pay either online or at the print shop.

Insight:
Flexible payment options improve **user convenience and adoption**.

3. Revenue Distribution

- Print shop completes the order
- EazePrint takes a **commission per order**
- Remaining amount goes to the shop

Insight:
This ensures both the platform and shopkeepers **earn from each transaction**.

4. Additional Revenue Streams

- Subscription plans for print shops (premium features)
- Advertising (future scope)

Insight:
Multiple income sources ensure **long-term scalability and sustainability**.

5. Growth & Profitability

As more users and shops join, the number of transactions increases.

Insight:
Higher volume leads to **higher revenue without increasing major costs (scalable model)**.

<u>Creativity and Insights</u> (High Level Summary for the above)

EazePrint is designed as an **innovative two-sided platform** that connects customers with local print shops through a cloud-based system. The Business Model Canvas is presented in a structured way, clearly showing how the business creates, delivers, and captures value. The inclusion of the EazePrint Agent for automatic printing adds originality, as it introduces **automation at the printer level**, which is not commonly seen in traditional printing solutions.

BMC

The Business Model Canvas of EazePrint demonstrates originality by presenting a two-sided platform that connects customers and print shops through a cloud-based system. The choice of customer segments, especially students, is practical due to their frequent and recurring printing needs. The value proposition fits well by addressing real problems like waiting time and manual processes, offering convenience and speed. Revenue generation through commissions and subscriptions ensures sustainability, while the asset-light model supports scalability. Overall, the BMC clearly explains how the business creates and captures value in a structured way.

Customer Journey Flowchart

The customer journey flowchart clearly explains how users interact with EazePrint from awareness to retention. It shows how users discover the platform, place orders easily, and receive quick service through automated printing. The process highlights convenience and time-saving, which directly aligns with the value proposition. The inclusion of retention and repeat usage demonstrates long-term customer engagement. This flowchart supports the BMC by visually showing how customer needs are fulfilled step-by-step.

Value Creation & Delivery Flowchart

The value creation and delivery flowchart demonstrates how EazePrint uses technology to efficiently convert user input into a completed service. It highlights the role of the cloud platform and the EazePrint Agent in automating the printing process, ensuring speed and accuracy. This reflects originality in integrating software with local print shops. The flow clearly shows how value is created through convenience and delivered through automation, directly supporting the value proposition in the BMC.

Revenue Flowchart

The revenue flowchart explains how EazePrint captures value through a practical and scalable model. It shows how each transaction generates revenue through commissions while also allowing print shops to earn, creating a balanced ecosystem. Additional revenue streams like subscriptions and future advertising strengthen sustainability. The flowchart clearly connects user activity with revenue generation, supporting the financial logic presented in the BMC.
